

HEARING AIDS & QUALITY OF LIFE

- **Studies show a strong correlation between hearing aid use and quality of life.**
- Patients who treat their loss with hearing devices report improvements in relationships at home (45%), feelings about self (37%), emotional health (34%), self-confidence (42%), sense of independence (44%) and sense of safety (42%).¹
- Positive improvements were also reported in social life, physical health, relationships with coworkers, work performance and overall quality of life.¹

¹ Picou, E. (2020). MarkeTrak 10 (MT10) survey results demonstrate high satisfaction with and benefits from hearing aids.
